Education

University of Doha for Science and Technology, Doha, Qatar

Bachelor of Science in Information Systems

Sept 2020 - Aug 2025

Experience

Sehtana

April 2026 – August 2026

Full Stack Developer, Doha, Qatar

- Developed and maintained full-stack features for a healthcare technology initiative addressing real-world clinical and operational needs identified through collaboration with healthcare stakeholders.
- Designed and implemented backend services and RESTful APIs to support data exchange and system integration across healthcare-related modules.
- Built and maintained responsive web application features using modern frontend and backend technologies.
- Contributed to system reliability through debugging, testing, and validation of core functionalities across development environments.
- Worked closely with cross-functional teams to translate requirements into scalable and maintainable software solutions.
- Participated in continuous improvement of system performance, usability, and development workflows within an enterprise healthcare context.
 - Technologies used: Flutter, Dart, React, JavaScript, Node.js, Express.js, REST APIs, Git/GitHub, Visual Studio Code, Android Studio

Edgage

Nov 2025 – Mar 2026

Software Quality Assurance, Doha, Qatar

- Performed thorough testing of new features and enhancements prior to release to ensure compliance with quality standards.
- Identified, documented, and tracked defects with clear reproduction steps using internal tracking tools.
- Executed functional, regression, and compatibility testing across multiple environments and platforms.
- Reviewed project requirements and technical specifications to assess usability, testability, and potential edge cases.
- Collaborated closely with developers to reproduce issues, validate fixes, and improve overall product quality.
- Contributed to the continuous improvement of QA processes, test coverage, and testing efficiency.
- Created and maintained test cases, checklists, and QA documentation to ensure comprehensive test coverage.
- Developed and executed basic automated end-to-end test scripts using Playwright and Cucumber to validate core user flows and support regression testing alongside manual QA.
 - Technologies used: Google Sheets, GitHub, Playwright, Cucumber, Visual Studio Code, JavaScript, Node.js

Monet

May 2025 – Aug 2025

Unreal Engine Developer, Doha, Qatar

- Built and optimized features in Unreal Engine to support interactive planning and visualization in 3D venue environments.
- Implemented multiplayer collaboration tools, enabling real-time asset placement and interaction among multiple users.
- Integrated an AI-assisted workflow that enhanced efficiency in creating 3D assets from reference materials.
- Designed and maintained RESTful APIs on the backend to ensure smooth communication between the 3D application and server.
- Improved system usability and performance by refining workflows and supporting cross-functional development efforts.
 - Technologies used: Diversion, Unreal Engine 5, JavaScript, Next.js, GitHub, Firebase, REST API, Visual Studio Code

Academic Projects

Sensei – Mobile Application

Jan 2025 – Feb 2025

- Collaborated with a team of three to develop a mobile app for peer tutoring, enabling registered tutees to request sessions based on specific topics and schedules.
- Implemented features for tutees to post requests and for tutors to accept or reschedule sessions, ensuring flexibility in learning.
- Integrated backend APIs to manage user registration, session scheduling, and request handling.
 - Technologies used: React Native, Expo, GitHub, Firebase, Visual Studio Code
 - Developed this app for UDST Skills Day Competition and won 1st Place

ThermoGuard – Advanced Monitoring Alert System

May 2024 – Dec 2024

- Lead the production of the ThermoGuard advanced monitoring alert system.
- Implemented a system that provides real time monitoring gathered and converted into readable values directly from the sensors.
- Developed a deep learning algorithm that predicts future temperature values based from a past given values to warn users of possible danger temperatures.
- Designed the dashboard that displays the monitoring system status such as power, temperature, and humidity.
- Created an interactive 3D server model in the dashboard where users can interact with it.
 - Technologies used: JavaScript, Node.js, GitHub, Python, MongoDB, Visual Studio Code

Skills

Languages: Python, JavaScript, Dart, HTML, CSS

Frontend / Mobile: React, Flutter, React Native, Vite, Electron

Backend: Node.js, Express.js, FastAPI, Flask, Next.js, REST API Development

Databases: MySQL, MariaDB, MongoDB, Firebase

Testing & Automation: Playwright, Cucumber

Tools: Git, GitHub, Postman, Figma, Visual Studio Code, Visual Studio 2022, Diversion

Other: Unreal Engine 5, SQLAlchemy

Achievements

Skills Day

Jan 2025 – Feb 2025

University of Doha for Science and Technology

- 1st place in Mobile App Competition.
- Built Peer Tutoring mobile application with 3 members.

Certifications

- Internship Certificate - Monet
- Internship Certificate - Edgage
